

53 yo F with right shoulder pain x7
months after fall.
MRN: 29112743

Ashley Burt

Aponeurotic
expansion of
supraspinatus tendon

Skeletal Radiol. 2015 Feb;44(2):223-31. doi: 10.1007/s00256-014-1993-4. Epub 2014 Sep 2.

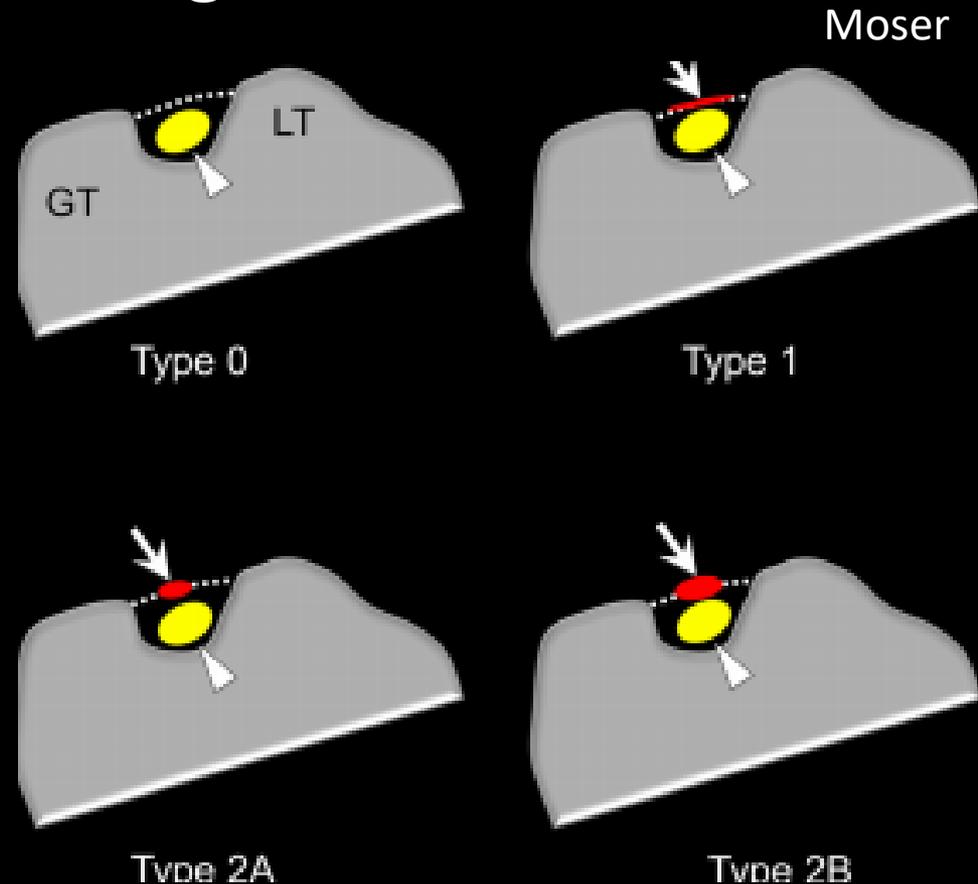

The aponeurotic expansion of the supraspinatus tendon: anatomy and prevalence in a series of 150 shoulder MRIs.

Moser TP¹, Cardinal É, Bureau NJ, Guillin R, Lanneville P, Grabs D.

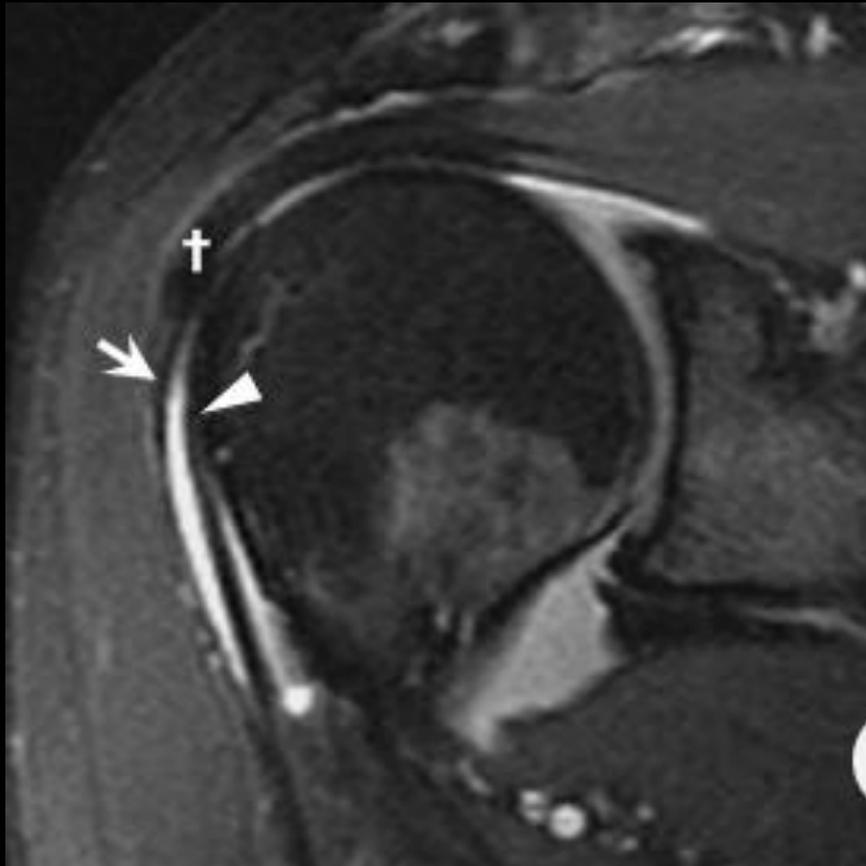

- Retrospectively reviewed 150 consecutive MRIs (1.5-T system)
- Characterized appearance
- 25 cadavers with ultrasound
 - If aponeurotic expansion is seen -> dissection

Aponeurotic expansion of the supraspinatus tendon

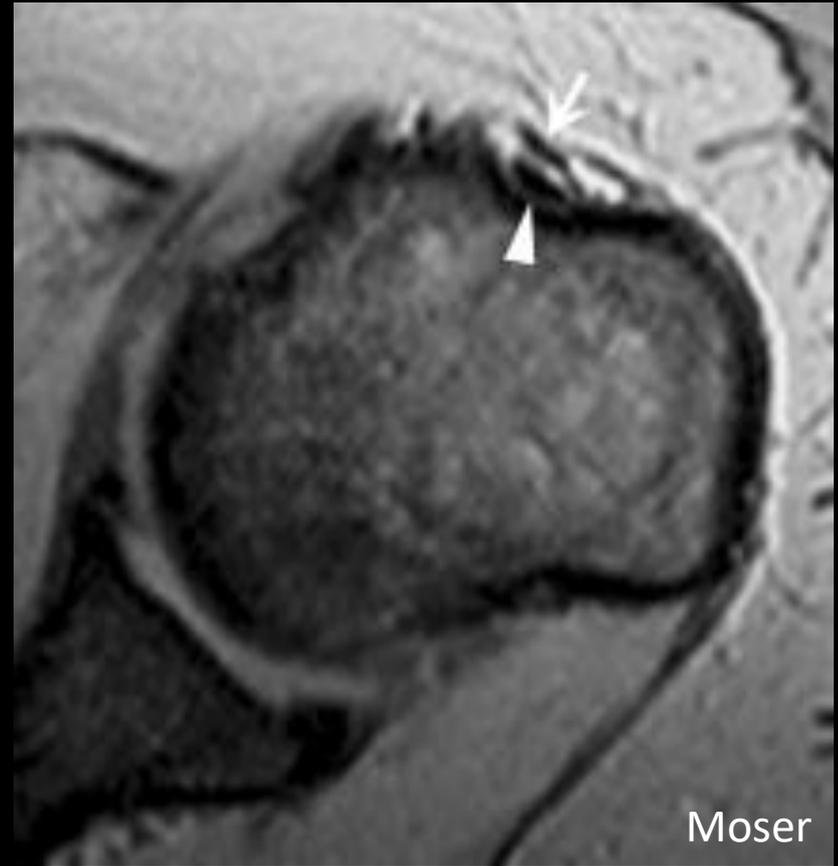

- Anterior & lateral to LHB in groove
- 49% of reviewed MRIs
 - Type 0: absence
 - 35%
 - Type I: thin flat
 - 35%
 - Type 2A: Oval <50%
 - 10%
 - Type 2B: Oval >50%
 - 4%

Type 2A

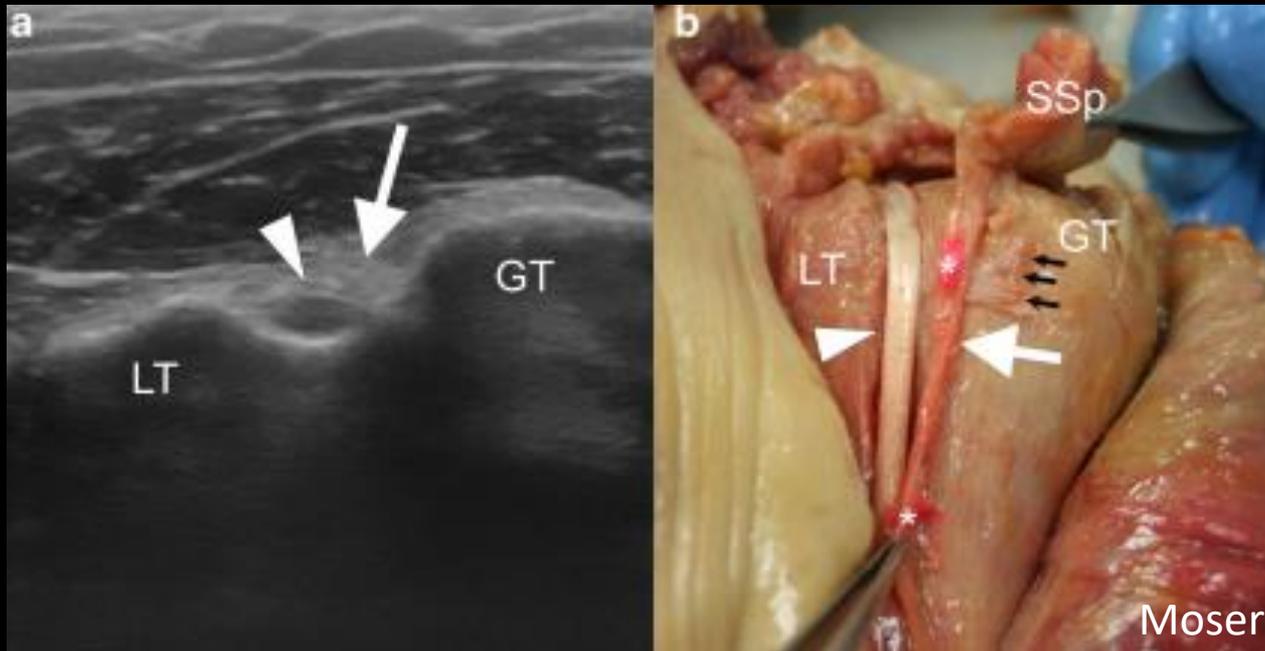

Type 2B

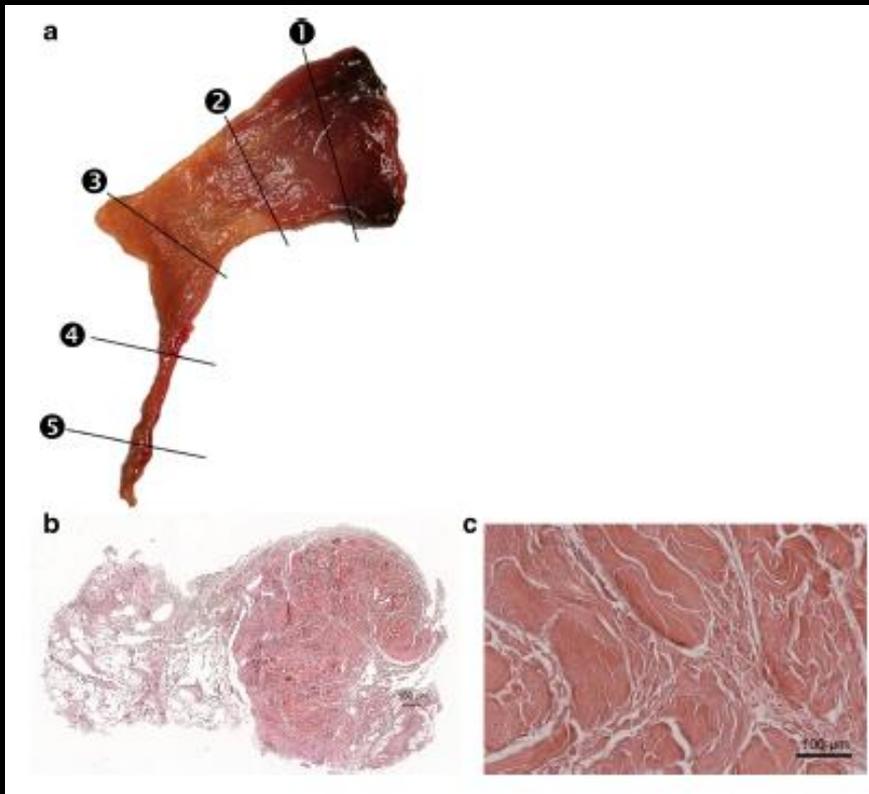

Cadaver Evaluation

- Seen on US: 28/50 shoulders
- Present at dissection: 20 shoulders
- Originate anterior, superficial supraspinatus tendon -> insert pectoralis major tendon

Aponeurotic expansion of the supraspinatus tendon

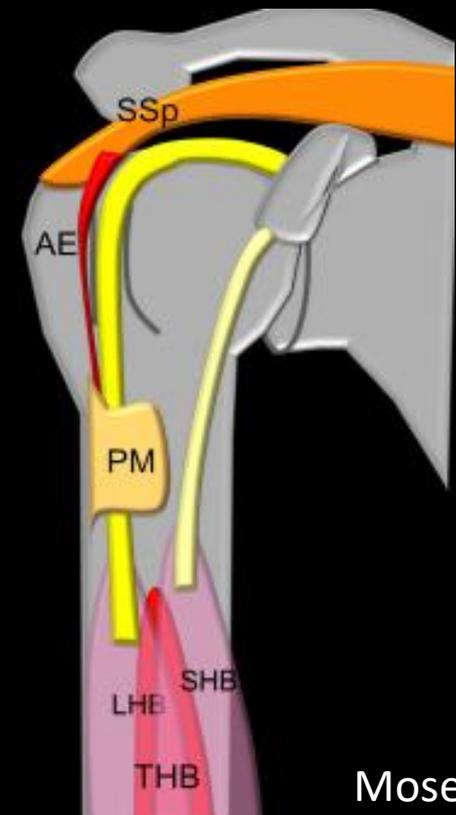

Organized collagen fascicles

Moser

Aponeurotic expansion of the supraspinatus tendon

- No gender predominance
- Bilateral ~79%
- Concurrent abnormal biceps 32%
 - Partial tear 56%
 - Complete tear 22%
 - Medial dislocation 22%
- Mimics split tear

Aponeurotic expansion of the supraspinatus tendon

- Previously described by Brody (1890) and Clark & Harryman (1992)
- Gheno et al: accessory biceps tendon
- Dierickx et al: intra-articular biceps tendon
