

Lecture: Radiological anatomy of the upper extremity.

Lecturer: Dr. T.H. Hughes

Outline of Key Points:

1. Review each imaging technique of:
 - a. Plain film
 - b. Conventional tomography
 - c. Arthrography
 - d. Ultrasound
 - e. Nuclear medicine
 - f. Computed tomography
 - g. Angiography
 - h. MRI
 - i. Contrast MRI

2. Look at each of these with a view to showing upper extremity anatomy including:
 - a. Bones
 - b. Joints
 - c. Ligaments
 - d. Tendons
 - e. Muscles
 - f. Subcutaneous tissues
